The First Chatbot KEY

Name _____

Work with a partner. Compare answers when you finish each problem.

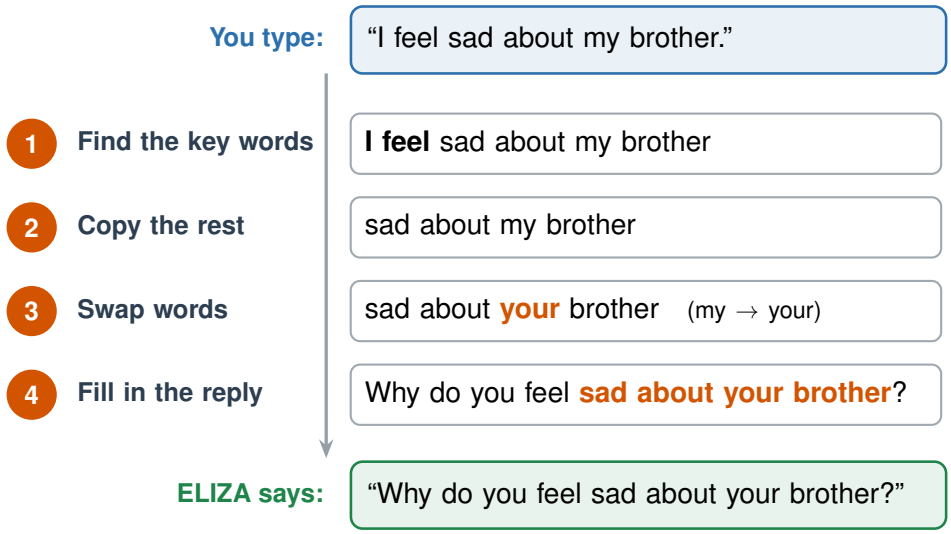
1. Be ELIZA. One partner is ELIZA. ELIZA can only answer with this card.

If your partner says . . .	**ELIZA says . . .**
I feel _____	Why do you feel _____?
I am _____	How long have you been _____?
I want _____	Why do you want _____?
a word about family	Tell me more about your family.
anything else	Please go on.

Write one thing ELIZA said that sounded **caring**: Answers vary.

Write one thing ELIZA said that sounded **strange**: Answers vary.

2. How ELIZA works.



Now you are ELIZA. Your partner types: **"I am worried about my test."**

1. Find the key words: I am

2. Copy the rest: worried about my test

3. Swap words: worried about your test (my → your)

4. Fill in the reply: How long have you been worried about your test?

3. People believed it.

When people feel that a computer understands them, but it does not, we call it the ELIZA effect.

Weizenbaum said some jobs should not be given to computers, even if a computer can do them.

4. Change ELIZA's rules.

A sentence that **broke** ELIZA: Answers vary.

What ELIZA said: Answers vary. Example: Please go on.

My new rule. When someone says: i like * ELIZA says: Why do you like *?

Did your rule work? _____ My rule in my home language: Answers vary.

5. The Chinese Room. Work in a group of 2 to 4.

Did the person in the room understand Chinese? no

How do you know? They only matched shapes in the rule book.

Note 6 asked: "Can you speak Chinese?" The room said: Yes, I can speak Chinese.

Was that true? no Did the replies make sense to the people outside? yes

6. Talk about it.

The whole room **does** / **does not** understand Chinese, because Answers vary.

ELIZA is like the Chinese Room because both follow rules and do not know what the words mean.

✂ *Cut out the cards. Add them to the class timeline.*

1966

Joseph Weizenbaum makes **ELIZA**, one of the first chatbots. It follows rules. People believe it understands them.

Draw a picture here.

1980

John Searle asks: does a room that answers in Chinese **understand** Chinese? (The Chinese Room)
