What do all the AI things have in common? They all . . .
learn from examples and make predictions (best guesses).

2. Write a rule for "cat." A computer gets a picture. Your rule tells the computer: **Is this a cat?**

It is a cat if it has Answers vary. Example: pointy ears, whiskers, and four legs.

A: a cat

B: a fox

C: a sleeping cat

Test your rule on each picture.

Picture	**My rule says** (cat / not a cat)	**Is my rule right?** (yes / no)
A	cat (example rule)	yes
B	cat	no, it is a fox
C	not a cat (no legs)	no, it is a cat

3. Quick, Draw! Go to `quickdraw.withgoogle.com`. Play all 6 rounds.
