How Chatbots Work

Name _____

Work with a partner. Compare answers when you finish each problem.

1. Finish the sentence. One word each.

Peanut butter and _____ Once upon a _____ I am going to the _____

2. Count what comes next. The training text:

> I like rice. I like soccer. I like rice and beans. My friend likes soccer. My friend likes rice.

Finish the table. Count how many times each word comes next. ("end" means the end of a sentence.)

After this word	These words came next (how many times)	Dice
I	like (3)	always "like"
like		1 to 4: rice, 5 or 6: soccer
likes		1 to 3: soccer, 4 to 6: rice
rice		1 to 4: end, 5 or 6: and
soccer		always end
and		always "beans"
beans		always end
My		always "friend"
friend		always "likes"

The dice column gives more common words more numbers.

3. Tiny chatbot, real chatbot.

Both chatbots predict the _____. Neither one checks if a sentence is _____.

A real chatbot reads _____: words and pieces of words.

4. The dice chatbot. Start with **I** or **My**. Roll a die when there is a choice.

Sentence 1: _____

Sentence 2: _____

Sentence 3: _____

Did you write a sentence that is **not** in the training text? Which one? _____

5. Talk about it. Did the tiny chatbot understand “My friend likes rice and beans”?

The tiny chatbot **did** / **did not** understand, because _____

_____

_____

Go Further (Day 2). The word-counting chatbot on screen.

With “always pick the most common,” is the sentence the same every time? _____

A strange sentence it wrote: _____

A sentence it wrote in my home language: _____
