AI and the News KEY

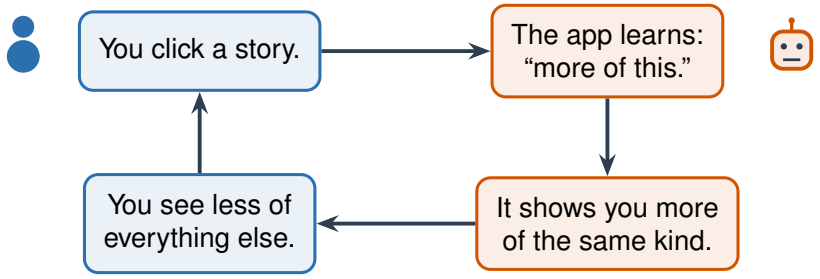
Name _____

Work with a partner. Compare answers when you finish each problem.

1. What did you see first today? (no names) Answers vary.

Why do you think the app showed it to you? Answers vary. I clicked things like it before.

2. The feed loop.



The app predicts which stories I will click and watch the longest.

Every click teaches the app. When it shows me only what I already like, that is a filter bubble.

3. Train a feed.

After 10 clicks, the topic the app thinks I like most	Answers vary.
How many different topics are in my feed now?	Answers vary. Fewer than at the start.
How many of my stories are also in my partner's feed?	Answers vary. Few or none.
When I clicked only angry stories, my feed	filled up with angry stories.

Angry stories spread fast because people click and share them more, so the app shows more.

4. Talk about it. An app should show me what I (like / need to know), because

Answers vary.

Go Further (Day 2). Trace a story back. The story: Answers vary.

S	Stop. How does it make me feel?	
I	Who posted it first?	
F	What do trusted news sources say?	
T	Where did it first appear?	

The sources the AI gave, and what I found when I checked them:

Source	**Is it real?**	**Does it say what the AI said?**
	yes no	yes no
	yes no	yes no
	yes no	yes no

My decision: true / false / missing important facts. My proof: Answers vary.
