AI and Jobs KEY

Name _____

Work with a partner. Compare answers when you finish each problem.

1. My dream job: Answers vary.

Three things a person in this job does: Answers vary.

2. Sort the tasks. Our job: Answers vary. Put a ✓ in one column.

Task	AI can do it	AI can help	A person does it
Example (nurse): make the work schedule	✓		
Example (nurse): calm a scared patient			✓

Why? Choose 3 tasks.

1. Answers vary. Hands-on work, caring for people, and being responsible are hard for AI.
2. _____
3. _____

A skill that will matter in this job in 10 years: Answers vary.

3. Robots are learning too. Robots usually start in places that are the same every day, like a warehouse or a truck yard.

4. Talk about it. *"Kids need to not worry about college and become plumbers and electricians."* Is he right? I think Answers vary.

because Answers vary. Robots are learning fast, but messy places like old houses are much harder.

Job cards (use these if there is no class AI tool today)

Nurse
take blood pressure; give medicine; write notes about patients; check medicine amounts; calm a scared patient; teach a family how to care for someone at home; make the work schedule; order supplies

Electrician
put wires in a new house; find why a light does not work; read building plans; write the price for a job; order parts; talk with the customer; work in small, tight spaces; check that the work is safe

Store manager
make the work schedule; count what is on the shelves; order new products; help an upset customer; train new workers; write sales reports; keep the store safe; choose sale prices

Interpreter
say a doctor's words in a patient's language; translate a written form; notice when a patient is confused; know polite words in both cultures; keep private information secret; learn new words before a meeting; write a bill; stay calm in hard moments

Go Further (Day 2). Ask a worker. Their job (no name): Answers vary.

Task	AI can do it	AI can help	A person does it

The part of their job they would never give to a machine: Answers vary.

Could a robot or AI do their job someday? When? Answers vary.
