Your Data, Your Privacy KEY

Name _____

Work with a partner. Compare answers when you finish each problem.

1. What does your phone know? List as many things as you can.

Answers vary. Where I go, who I text, my photos, what I search, what I watch, my face, my voice.

2. Give or leak? Write each one in the right column:

what I type, where my phone is, a photo I post, what I click, hidden information in a photo, my name when I sign up, how long I watch a video

Data I give (I know I share it)	**Data I leak** (I may not know)
what I type, a photo I post, my name when I sign up	where my phone is, what I click, hidden information in a photo, how long I watch a video

3. Find the hidden location. Use the sample photo.

Camera	Example Phones Model 7
Date and time	September 12, 2026, 4:42 PM
Location (numbers)	38.94468, −92.32898
The place on the map	The Columns at the University of Missouri, Columbia

Hidden information about a file is called metadata.

After I made a clean copy, was the location still there? no

A photo of my dog in my backyard could show my home address.

4. Talk about it. A free app that sells my data is (fair / not fair) because

Answers vary.

Go Further (Day 2). What can your apps see? Does each app **need** this to work?

App	Asks for	Needs it?	Why
Flashlight app	your contacts	no	A light does not need your friends' numbers.
Map app	your location	yes	It shows where you are.
Puzzle game	your microphone	no	A puzzle does not need to hear you.
Camera app	your camera	yes	It takes pictures.
Camera app	your location	no	Photos work without it. It adds metadata.
Weather app	your location	maybe	Only the city, and only while you use it.

One permission I would turn off: Answers vary. Why? _____
