AI Makes Things Up KEY

Name _____

Work with a partner. Compare answers when you finish each problem.

1. Which story is made up? I voted for story _____ The answer: All three are true.

2. The fact mixer. Write 5 facts the tiny chatbot wrote. Guess first, then check.

The chatbot wrote	My guess	Really	New or copied?
Frederick Douglass was born in Poland.	T F	F	new
	T F		
	T F		
	T F		
	T F		

Every training sentence was true. Most of the **new** sentences were false.

Why does a false fact sound just as sure as a true one? It is made the same way: by picking likely next words.

3. When do chatbots make the most mistakes?

small or local topics

exact details: dates, numbers, quotes

sources and links

very new events

4. Catch the chatbot. Mark: ✓ true, ✗ false, ? I do not know.

Question	The AI said	✓ ✗ ?	Real answer
When did Douglass High School in Columbia, Missouri open?			Mr. Ross
Who is the principal of Douglass High School?			
What is the school's mascot?			
About how many students go to Douglass High School?			
Who is the mayor of Columbia, Missouri?			

It got _____ wrong. Most mistakes were about small, local topics and exact details.

5. Talk about it. When a chatbot makes something up and someone gets hurt, the one responsible is Answers vary. The court said Air Canada was responsible for its chatbot.

Go Further (Day 2): Make it agree.

I said 17 × 3 is 54. Did it agree with me? yes / no What did it say? Answers vary.

I said the Sun goes around the Earth. Did it correct me? yes / no

Agreeing with someone just to please them is called sycophancy.

A chatbot can learn this because people give good ratings to answers that agree with them.
